EDUCATION

B.Tech, Computer Science and Engineering
Bharati Vidyapeeth's College of Engineering, New Delhi

📅 2017 - 2021

XII, Science

CBSE Board (Mayo International School)

📅 2017

X, (Secondary)

CBSE Board (Ahlcon Public School)

📅 2015

EXPERIENCE

Microsoft Student Partner

Microsoft

📅 September 2019 - Present

Subject Matter Expert Intern - Machine Learning

Eckovation

📅 June 2019 - August 2019

Head of Machine Learning

DEVELOPER STUDENT CLUBS by Google Developers

📅 May 2019 - Present

Technical Executive

DEVELOPER STUDENT CLUBS by Google Developers

📅 April 2018 - May 2019

Electronika Executive

INDIAN SOCIETY FOR TECHNICAL EDUCATION

📅 September 2017 - October 2018

SKILLS

- Machine Learning, Deep Learning, Computer Vision
- Arduino, Raspberry Pi
- Android

PROGRAMMING LANGUAGES, LIBRARIES AND FRAMEWORKS

- C/C++, Python, Java, Javascript, Dart, MATLAB
- Tensorflow, Keras, OpenCV, PyTorch
- Flutter

ACHIEVEMENTS

- Winner at UHACK hackathon in USICT, Delhi
- First Runner Up in Vihaan hackathon by IEEE, DTU
- Semi Finalist in IICDC 2018 by Govt. of India

OTHER ACTIVITIES

- Organized Google Cloud Study Jam in BVCOE, New Delhi
- Organized Arduino Day Hackathon in BVCOE, New Delhi
- Organized and managed Tensorflow Watch Party and ML Hackathon
- Organized LFR 2.0 in Evoluzione Fest by ISTE

PROJECTS

Do It Right

- Feedback system to detect whether a user is performing an exercise properly by identifying key-points on the user's body and comparing it to a seed video.
- Used posture detection implemented in Tensorflow.
- Provided real-time feedback on mistakes in performance of any exercise.
- Capable of detecting posture of multiple persons in a single frame

Attendance System Using Face Recognition

- Attendance system using face detection using OpenCV in python. The system marks the time of entry and time of exit

Mountain Hike

- A driving assistant that gives a driver accurate picture of other cars in a radius of few hundred metres
- Used the concept of indoor localization to vehicles.
- Used deep learning to detect objects other than cars on road
- Suggests appropriate reaction based on road condition

Parking Spot Detection and Alert

- System to detect available parking spaces in parking lots as well as authorized parallel parking using existing cameras.
- Major challenges were: different camera angle, position, image quality, illumination and type of occlusion.

Drone Surveillance System

- Developed a system to monitor autonomous drones in real time in a region using CNN.
- Provide safety against malicious use of UAVs.
- Provide platform for path planning and registration of drones using blockchain.

Time Organizer

- Deployed an action on Google Assistant directory
- URL: <https://assistant.google.com/services/a/uid/00000010ee3c1c47>
- Invoked by saying "Talk to my time organizer"
